is our commitment to listen, innovate and provide expert solutions to our clients around the world.

Custom Solutions

Sealed Air's Nelipak® business delivers total turnkey packaging solutions, which are guaranteed to meet the demanding requirements of the medical and pharmaceutical markets. Our thermoformed sealable blisters and trays coupled with our medical films offer superior sterile barrier packaging performance across a range of applications.

Coupled with our Cleanroom Campus we offer manufacturing space, warehousing, serviced offices, design, prototyping and manufacturing.

Alternatively, our cleanroom campus can be used as an extension to current operations as contract packers for overflow and end of lifecycle products

Data specifications for air handling and cooling systems available on request

Nelipak® in Action

Nelipak provided a multinational Medical Device company with cleanroom manufacturing space when they outgrew their existing facility. This was supported with dedicated warehouse, engineering and office space allowing them to operate as if it were their own facility.

For a local device start up company we provided cleanroom facilities staffed by our operatives. This enabled them to grow their business to the point where they were able to hire their own operatives while Nelipak continued to provide them with the infrastructure to support their business model.
